

Encoding Transmitter: Compact 2

USE SECTION 1 IF YOU HAVE A REMOTE CONTROL WHICH WILL OPERATE THE COMPACT 2 (YOU ARE PROGRAMMING IN AN ADDITIONAL REMOTE CONTROL)

SECTION 1

1. Ensure the alarm is disarmed & the motorcycle ignition switch is off
2. Ensure the alarm purple wire is separate - not connected to anything
3. Connect the alarm green wire to the green/purple wire
4. Connect (3) above to the motorcycle battery positive
5. Switch on the motorcycle ignition
6. Press the new remote once - you should hear one beep from the compact 2
7. Wait 5 seconds
8. Press the new remote once - you should hear two beeps from the compact 2
9. Switch off the motorcycle ignition and remove the wires from the battery positive.
10. Test. If the unit has failed to programme, you will need to repeat the process twice more. Return alarm wires to original state.

USE SECTION 2 IF YOU DO NOT HAVE A REMOTE CONTROL WHICH WILL OPERATE THE COMPACT 2 (SUCH AS YOU HAVE LOST THE ORIGINAL AND ARE PROGRAMMING IN A NEW REMOTE)

SECTION 2

1. Ensure the motorcycle ignition switch is off and the alarm in- line fuse is removed.
2. Ensure the alarm purple wire is separate - not connected to anything
3. Connect the alarm green wire to the green/purple wire
4. Connect (3) above to the motorcycle battery positive
5. Switch on the motorcycle ignition and then replace the alarm in-line fuse
6. Press the new remote once - you should hear one beep from the compact 2
7. Wait 5 seconds
8. Press the new remote once - you should hear two beeps from the compact 2
9. Switch off the motorcycle ignition and remove the wires from the battery positive.
10. Test. If the unit has not programmed, you will need to repeat this process twice more. Return alarm wires to original state.
